TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, SQL, C++, Python

Frontend: React (Hooks, Context API, functional components), Next.js, Redux, MUI, Tailwind CSS, shadcn/ui (Radix UI), Sass, responsive design

Tools & Practices: Git, GitHub, ESLint, Prettier, Jest, Vitest, REST API integration, Agile, code review

Backend & Databases: Node.js, Express, PostgreSQL, Prisma, Supabase

EXPERIENCE

Software Engineer Intern (Frontend)

Jun 2025 – Jun 2026

KoinX

Remote

- Built reusable, responsive UI components in React and TypeScript, following the team's component-driven architecture.
- Delivered 70+ pull requests across multiple production repositories, each reviewed and merged under the team's code-review standards.
- Worked with senior engineers in an Agile workflow to meet quality and performance targets on user-facing features.

Full Stack Developer

Dec 2024 – Feb 2025

Pixels and Grids

Remote

- Built and enhanced full-stack features for client applications, collaborating with designers and developers from design handoff through deployment.
- Designed and integrated secure REST APIs and relational database schemas, improving data consistency and feature reliability.

PROJECTS

CryptoTax Buddy | *TypeScript, React 19, Next.js, TanStack Query, Express, PostgreSQL*

Solo project

- Built the Next.js App Router dashboard (React 19, TanStack React Query, shadcn/ui, Tailwind CSS) for an Indian crypto-tax platform, including a streaming AI chat UI with tool-call badges.
- Implemented a resilient client auth layer: Axios interceptors that attach bearer tokens and dedupe concurrent 401s into a single shared token refresh before retrying.
- Also built the Express + Prisma backend, whose deterministic FIFO tax engine is covered by 38 Vitest unit tests.

Blood Link | *React 19, Next.js 15, TypeScript, Supabase (PostgreSQL/PostGIS), Tailwind CSS*

Solo project

- Developed a responsive, dark-mode UI on accessible Radix UI primitives (shadcn/ui), with interactive MapLibre and Leaflet maps, geolocation, and skeleton loading states.
- Implemented geolocation-driven donation-camp search with debounced filtering, distance ranking, and paginated loading over PostGIS-backed queries.

EDUCATION

I.K. Gujral Punjab Technical University

2022 – 2026

B.Tech, Computer Science (CGPA: 8.6/10)

Punjab, India

NIELIT

2024

Full Stack Web Development Training (Grade S, 80%+)

ACHIEVEMENTS

Runner-up, Code Hunt Competition, GNA University (teams from 20 colleges); Runner-up, Byte Battle programming contest, IKGPTU.

CERTIFICATIONS

Google Cloud Foundations (Google Cloud); JavaScript Algorithms & Data Structures (freeCodeCamp); Node.js, Express.js & SQL (Scrimba).
