TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, SQL, Python, C++
Frontend: React, Next.js, Redux, Tailwind CSS, shadcn/ui, MUI, Recharts, responsive design
Backend & Databases: Node.js, Express, PostgreSQL, Prisma, Supabase, REST APIs
Tools & Practices: Git, GitHub, Agile/Scrum, code review, Vitest, Jest

EXPERIENCE

Software Engineer Intern (Frontend) Jun 2025 – Jun 2026
KoinX *Remote*

- Built reusable, responsive UI components in React and TypeScript, adopted across multiple production repositories.
- Delivered 70+ pull requests, each reviewed and merged under the team's code-review standards.
- Worked with senior engineers in an Agile workflow, taking user-facing features from ticket to shipped UI.

Full Stack Developer Dec 2024 – Feb 2025
Pixels and Grids *Remote*

- Built full-stack features for client applications, from design handoff through deployment.
- Designed and integrated REST APIs and relational database schemas alongside designers and developers.

PROJECTS

CryptoTax Buddy | *TypeScript, React, Next.js, Node.js, Express, PostgreSQL, Vercel AI SDK* *Solo project*

- Built a Next.js dashboard (React, TanStack Query, shadcn/ui) turning raw exchange transaction data into per-year tax summaries, disposal tables, and a data-health issues panel.
- Built a streaming AI assistant (Vercel AI SDK, Google Gemini) using an agentic tool-calling loop over 8 whitelisted, database-backed tools, so every figure it reports is real and traceable rather than model-generated.
- Designed a deterministic FIFO tax engine handling Indian VDA tax rules with decimal-precision arithmetic, covered by 27 Vitest unit tests.
- Implemented streaming CSV ingestion (Busboy) with manual backpressure, handling uploads up to 1 GB without loading files into memory.

Faculty Feedback | *React, Next.js, TypeScript, PostgreSQL, Prisma, Recharts* *Solo project*

- Built role-based analytics dashboards for five user types, rendering rating-distribution, score-ranking, and completion charts with Recharts from server-computed aggregates.
- Wrote a server-side analytics module that transforms raw feedback rows into leaderboards, rating histograms, cross-cycle trends, and comparative rankings of the same subject across teachers.
- Re-platformed a single-tenant JavaScript/MongoDB prototype into a multi-tenant TypeScript app (Next.js App Router, React Server Components, Prisma/PostgreSQL) with transactional feedback submission and JWT/OTP auth.

EDUCATION

I.K. Gujral Punjab Technical University 2022 – 2026
B.Tech, Computer Science (CGPA: 8.6/10) *Punjab, India*

NIELIT 2024
Full Stack Web Development Training (Grade S, 80%+)

ACHIEVEMENTS

Runner-up, Code Hunt Competition, GNA University (teams from 20 colleges); Runner-up, Byte Battle programming contest, IKGPTU.

CERTIFICATIONS

Google Cloud Foundations (Google Cloud); JavaScript Algorithms & Data Structures (freeCodeCamp); Node.js, Express.js & SQL (Scrimba).
