

Gautam Anand

Software Engineer

Mohali, Punjab, India | +91 7717484812 | gautam.anand.ptu@gmail.com
github.com/Agent-Gautam | linkedin.com/in/gautam-anand-ptu

TECHNICAL SKILLS

CS Foundations: Data Structures & Algorithms, Object-Oriented Programming, Problem Solving, SDLC

Languages: Python, JavaScript (ES6+), TypeScript, C++, C, SQL, HTML5, CSS3

Backend & Databases: Node.js, Express, REST APIs, PostgreSQL, Prisma, Supabase, Zod

Frontend: React, Next.js, Redux, TanStack Query, Tailwind CSS, shadcn/ui, MUI, Bootstrap, responsive design

Tools & Practices: Git, GitHub, Vitest, Jest, ESLint, Prettier, Agile/Scrum, code review

EXPERIENCE

Software Engineer Intern (Frontend)

Jun 2025 – Jun 2026

KoinX

Remote

- Shipped 11 production features across 7 repositories in a fast-moving startup codebase, working primarily in React/TypeScript/Next.js and navigating an unfamiliar large-scale codebase by tracing existing patterns before extending them.
- Owned the transaction-categorization and internal-transfer surface of KoinX's accounting platform across 12 shipped changes — categorization flows, uncategorize/re-recognize actions, workspace-level transfer settings (React, TypeScript, Redux Toolkit).

Full Stack Developer

Dec 2024 – Feb 2025

Pixels and Grids

Remote

- Built full-stack seller and buyer modules for a multi-vendor e-commerce platform (KollaBee), including product CRUD with multi-image uploads (cover, thumbnail, detail) to Supabase, dynamic order/analytics dashboards, and an integrated Razorpay checkout flow.

PROJECTS

Cryptax | *TypeScript, Node.js, Express, PostgreSQL, Prisma, Next.js, Gemini API*

Solo | [Live](#) | [Code](#)

- Built a REST API on Node.js/Express with a PostgreSQL + Prisma data layer and Zod-validated inputs, plus a deterministic FIFO tax engine for Indian VDA rules covered by 27 Vitest unit tests.
- Added a streaming AI assistant (Google Gemini) over 8 whitelisted, database-backed tools, so every figure it reports is real and traceable rather than model-generated.

Faculty Feedback | *Next.js, React, TypeScript, PostgreSQL, Prisma*

Solo | [Live](#) | [Code](#)

- Re-platformed a single-tenant JavaScript/MongoDB prototype into a multi-tenant TypeScript app (Next.js, Prisma/PostgreSQL) with role-based analytics dashboards and JWT/OTP authentication.
- Modeled a 14-table multi-tenant PostgreSQL schema with composite-unique idempotency, and wrote a 690-line aggregation module producing teacher leaderboards, rating histograms, and cross-cycle trends.

Blood Link | *Next.js, React, TypeScript, Supabase (PostgreSQL/PostGIS)*

Solo | [Live](#) | [Code](#)

- Built a location-aware blood-donation platform on Supabase: distance-ranked nearby-camp search via hand-written PL/pgSQL PostGIS functions, secured by 41 row-level-security policies across 13 tables.
- Designed a three-sided role-gated API on Next.js Server Actions (donor / organisation / admin) with defense-in-depth auth — edge middleware, row-level security, and server-action re-authentication.

EDUCATION

I.K. Gujral Punjab Technical University

2022 – 2026

B.Tech, Computer Science (CGPA: 8.6/10)

Punjab, India

NIELIT

2024

Full Stack Web Development Training (Grade S, 80%+)

ACHIEVEMENTS & CERTIFICATIONS

Runner-up, Byte Battle (Data Structures & Algorithms) contest, IKGPTU; Runner-up, Code Hunt Competition, GNA University (teams from 20 colleges).

Certifications: Google Cloud Foundations (Google Cloud); JavaScript Algorithms & Data Structures (freeCodeCamp); Node.js, Express.js & SQL (Scrimba).
